

Program DSP meeting November 2nd 2010.

	Chairman: H.Philipsen
10:00-10:05	Opening SAC
10:05-10:45	Paul Haddad, University of Tasmania Separation of inorganic ions by ion chromatography and capillary electrophoresis. Which is best?
10:45-11:15	Coffee Break & Exhibition
	Chairman: E.Mes
11:15-11:45	Jindra Purmová, AkzoNobel Chemicals Characterization of maltodextrin – acrylic hybrid copolymers.
11:45-12:15	Jos de Heer, Sabic Innovative Plastics Automated (multivariate) data analysis for SEC.
12:15-13:35	Lunch & Posters and Exhibition
	Chairman: E.Gelade
13:35-14:05	Greg Saunders, Agilent Technologies Protein Analysis by Size Exclusion Chromatography
14:05-14:35	Bastiaan Staals, BASF Using an Evaporative Light scattering Detector (ELSD) for quantification with LC, a blessing or a curse?
14:35-15:05	Paul Cools, DSM NeoResins Industrial applications of SEC hyphenated with ESI-TOF-MS.
15:05-15:35	Coffee Break & Exhibition
	Chairman: H.Brouwer
15:35-16:05	Albert de Graaf, University of Utrecht Challenges in molecular weight determination of PEG-pNIPAM block copolymers.
16:05-16:35	Aleksandra Chojnacka, University of Amsterdam Study of solubility and dissolution of polymers.
	Chair: E.Kellenbach
16:35-17:15	Jaques Joosten, DSM The crucial role of Analytical Science and Technology for Innovations in the Dutch Chemical Sector.
17:15-17:25	Launch TI-COAST
17:25-18:00	Drinks & Exhibition
